

Design system v1

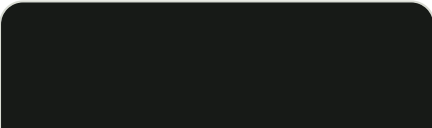

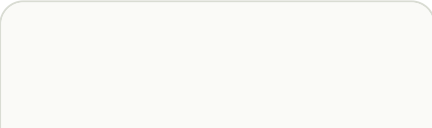

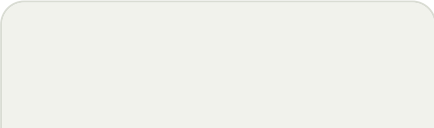

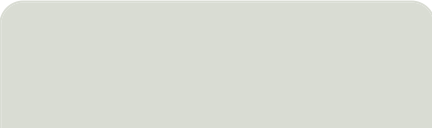

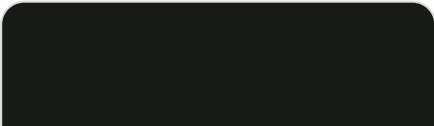

Tokens, type and components for Raah. Road signage and registration plates, not fintech: black on white, black on yellow, one accent, borders instead of shadows.

01 — COLOUR

Tokens

One accent, yellow, used only for focus, progress, current step and selection. Status colour is never yellow. Semantic colour appears as a chip or a 3px left edge — never as a card tint.

02 — TYPOGRAPHY

Scale

Mukta for headings, numbers and buttons. Noto Sans for body and forms. IBM Plex Mono for reference, licence and vehicle numbers. Every line is shown in English and Devanagari: line-height is generous and no text container has a fixed height, so taller Indic ascenders and descenders never clip.

03 — BUTTONS

Four kinds, six states

Labels are verbs that name what happens. Mobile 56px tall and full width; desktop 48px and auto width with 32px side padding. Focus is a 3px accent ring at 2px offset over a 1px ink outline, so it survives on yellow.
